

# INFRARED GUYS, Inc.

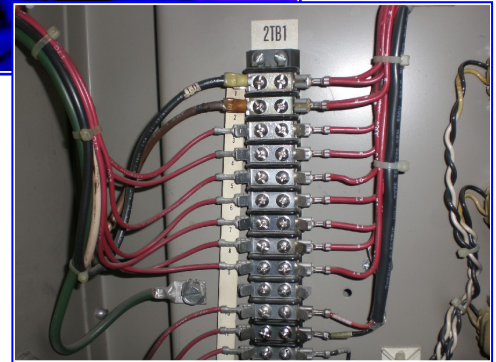

## Infrared/Thermal Imaging Services

### Electrical System Surveys:

- ✓ Identify Problems Prior to Failure
- ✓ Save Money and Headaches
- ✓ Avoid unscheduled downtime
- ✓ Reduce Risk of Fires
- ✓ Energy Savings

*Bad Connection at Terminal Strip*

### Who we are:

A group of trained and experienced professionals, equipped with top-of-the-line equipment. We have been doing infrared/thermal imaging since 2002. We are independent third-party consultants, not electrical contractors. This is important because we have no vested interest in what we find.

### How we are different:

We handle all access to equipment, remove panel covers and complete our inspection with minimal disruption to your staff/operations.

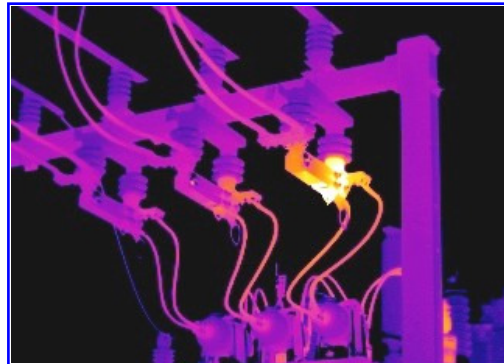

We provide a full written report listing all the equipment that was inspected, and a complete set of digital thermal images and regular photos to keep for your records. Where appropriate, ampere readings are also shown on the report. For any thermal anomaly, a detailed description with printed image, probable cause, and recommended action are shown in the report.

### We also do:

- Roof Inspections
- Mechanical Inspections
- Building Envelope Inspections
- Residential Inspections

### We have done IR work for:

- Hilton Hotels/Embassy Suites
- Simon Property Group
- McKesson Pharmaceutical
- Rock Tenn
- Duke Realty
- E\*TRADE -- and many others, large and small.
